

APT75GN60B(G) APT75GN60S(G) 600V

Utilizing the latest Field Stop and Trench Gate technologies, these IGBT's have ultra low $V_{CE(ON)}$ and are ideal for low frequency applications that require absolute minimum conduction loss. Easy paralleling is a result of very tight parameter distribution and a slightly positive $V_{CE(ON)}$ temperature coefficient. A built-in gate resistor ensures extremely reliable operation, even in the event of a short circuit fault. Low gate charge simplifies gate drive design and minimizes losses.

- **600V Field Stop**
 - **Trench Gate: Low $V_{CE(on)}$**
 - **Easy Paralleling**
 - **6 μ s Short Circuit Capability**
 - **Intergrated Gate Resistor: Low EMI, High Reliability**
- Applications: Welding, Inductive Heating, Solar Inverters, SMPS, Motor drives, UPS**
