

1-Bit Dual-Supply Level Translator

Product Preview

NL3V1T244, NL3V1T240, NL3V1T34

The NL3V1T244 / NL3V1T240 / NL3V1T34 are 1-bit configurable dual-supply level translators with 3-state outputs. The A- and B- ports are designed to track two different power supply rails, V_{CCA} and V_{CCB} respectively. Both supply rails are configurable from 0.9 V to 3.6 V allowing universal voltage level translation between the A- to B- ports.

The NL3V1T244 / NL3V1T34 are 1-bit level translators that allows non-inverting translations from A to B ports. The NL3V1T240 is a 1-bit level translator that allows inverting translations from A to B ports.

The output enable pin ($\overline{OE}$), when High, disables all the output ports by putting them in 3-state. The $\overline{OE}$ pin is designed to track V_{CCA} . The NL3V1T34 does not have an $\overline{OE}$ pin.
